

DIAMOND

SERIES

CKWORLDWIDE.COM

American Innovation. German Precision.

The Diamond Series is the result of a true collaboration between CK Worldwide and EWS. Two companies brought together by a shared commitment to precision, performance, and the professionals behind the torch. Designed side by side from the ground up, this line brings together American innovation and German manufacturing to create a TIG torch system that feels as good as it performs. Every detail was chosen with purpose, to deliver more comfort, more control, and more confidence with every weld.

EXPLORE THE DIAMOND SERIES >>>

DESIGNED AROUND YOU

Engineered to give you greater balance, control, and confidence every time you strike an arc.

MAX-FLO™ Cooling

Reducing downtime and keeping torches running longer

Interchangeable Switch Modules

Single-button, dual-button, Lever-switch or up/down

Multiple Handle Versions

Short or long gives you maximum flexibility

SuperFlex™ Cables

Innovative design replaces heavy, stiff cables to boost mobility, reduce fatigue, and increase productivity

CK leather protection

Protects your cables for maximum durability and longevity

CHOOSE YOUR SETUP

Every welder is different, and Diamond Series torches are built to adapt to your work, your hands, and your style

STEP 1: CHOOSE YOUR HEAD

RIGID HEAD

Fixed head for durability and consistent positioning.

FLEX HEAD

Adjustable angle for access in tight or awkward spaces.

STEP 2: CHOOSE YOUR HANDLE

LONG HANDLE

Extended grip for comfort and balance in all-day welding.

SHORT HANDLE

Compact profile for precision work and tighter areas.

STEP 3: COOLING TYPE (BY MODEL)

GAS COOLED

Simple, portable cooling — ideal for lighter-duty TIG.

WATER COOLED

Superior cooling for high amps and long duty cycles.

EDS9

Lightweight and precise. Ideal for thin materials, detail work, and tight-access welding. Built to give you smooth, consistent performance when control matters most.

EDS17

Balanced and versatile. A dependable choice for shop work, field repairs, and jobsite welding. Engineered for all-around comfort and reliability in everyday TIG.

EDS26

Rugged and powerful. Built for fabrication, structural TIG, and heavy-duty air-cooled performance. Handles higher output with confidence, even in demanding applications.

EDS230

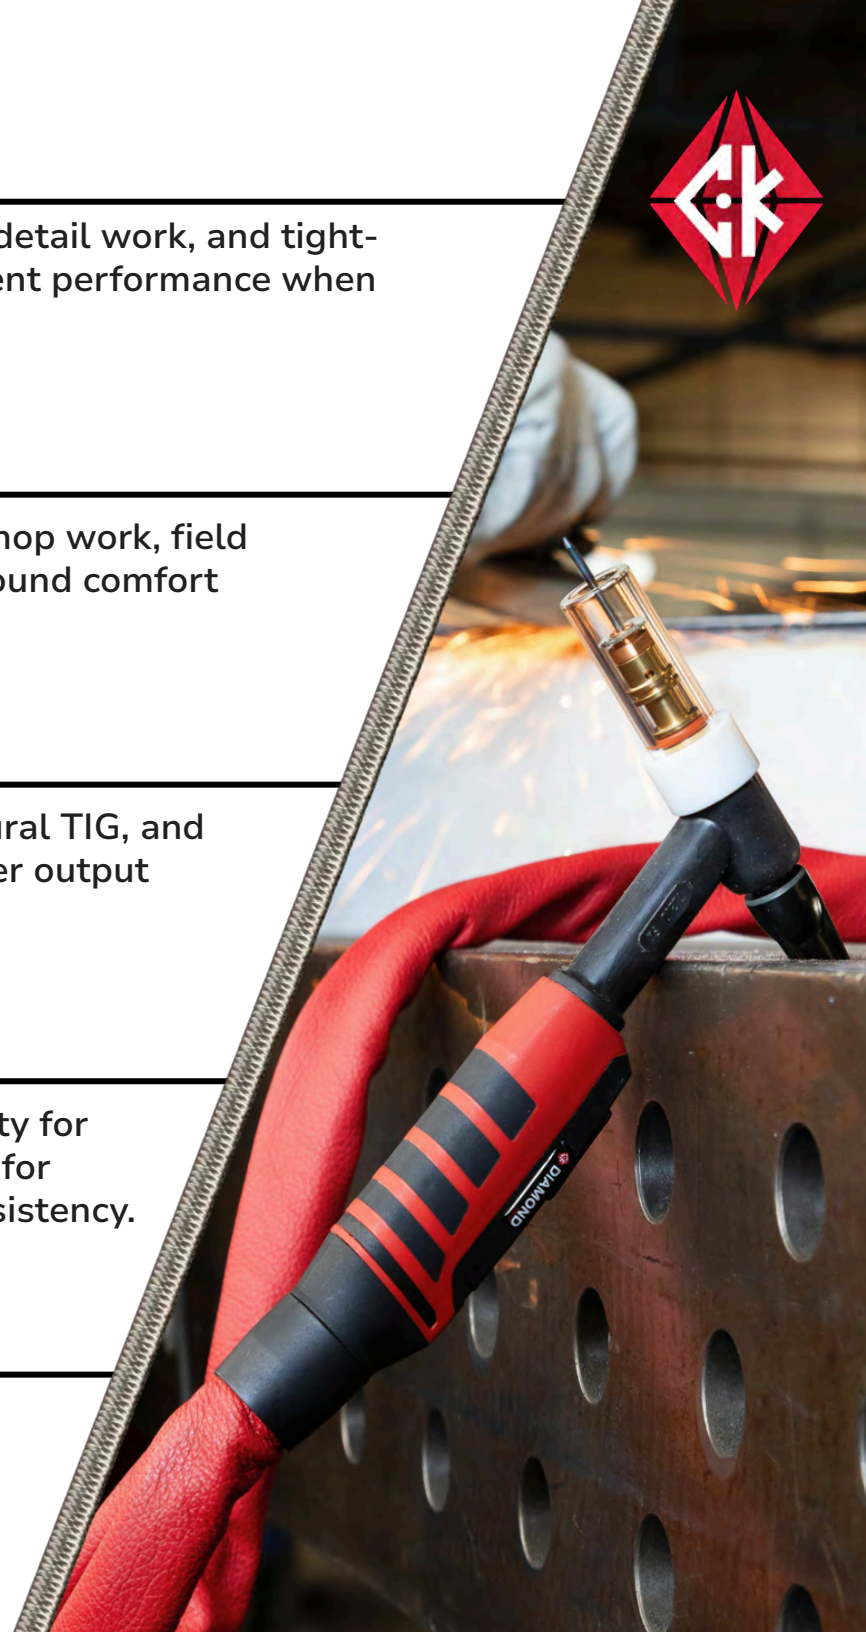

High-amp comfort. Exceptional cooling and stability for production welding and heavy fabrication. Perfect for welders who need refined control and all-day consistency.

EDS18

Maximum output. Designed for long welds, thick materials, and high-production TIG applications. Delivers unmatched arc stability and durability under high amperages.

ALL THINGS TIG WELDING

From torches and machines to tungsten and consumables, the Diamond Series is just the start. CK Worldwide and European Welding Services deliver a full TIG ecosystem built for precision, performance, and reliability.
